MadMarv Mounts
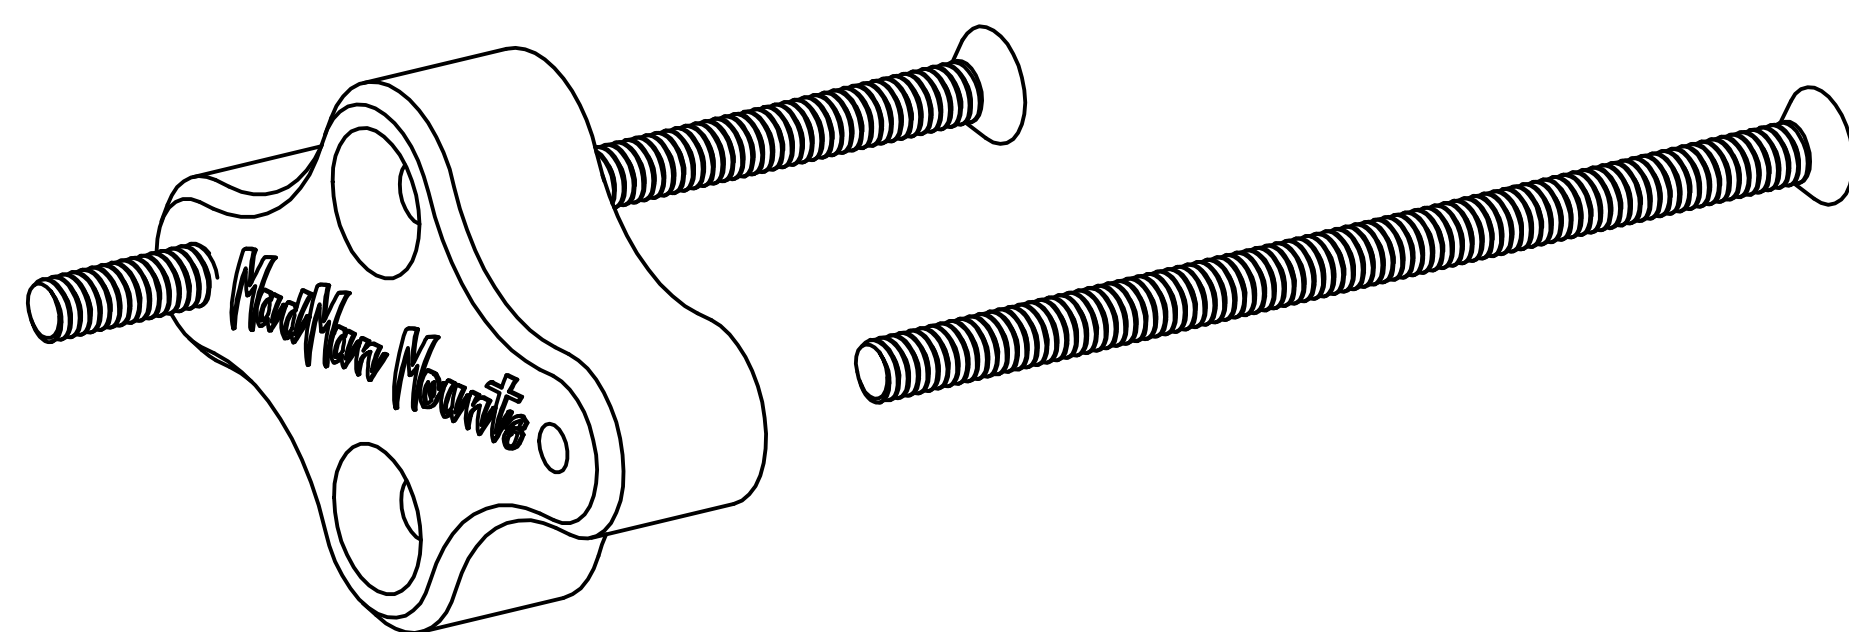

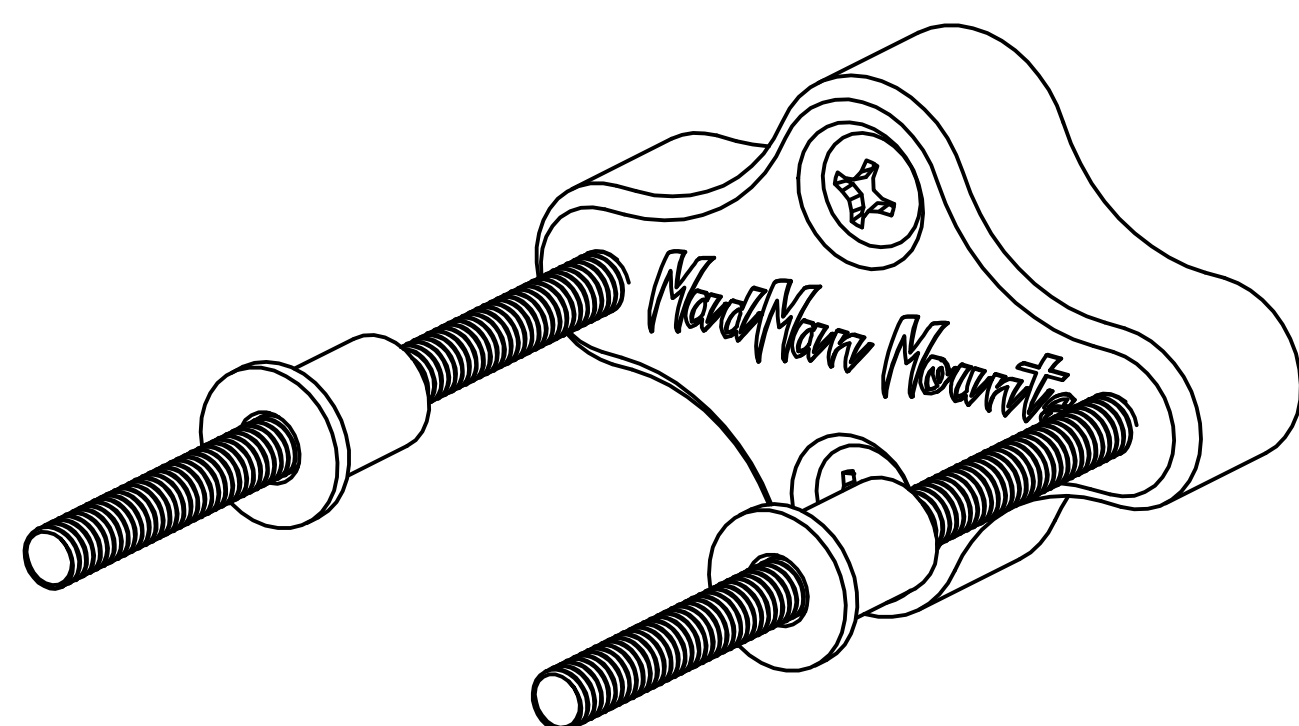

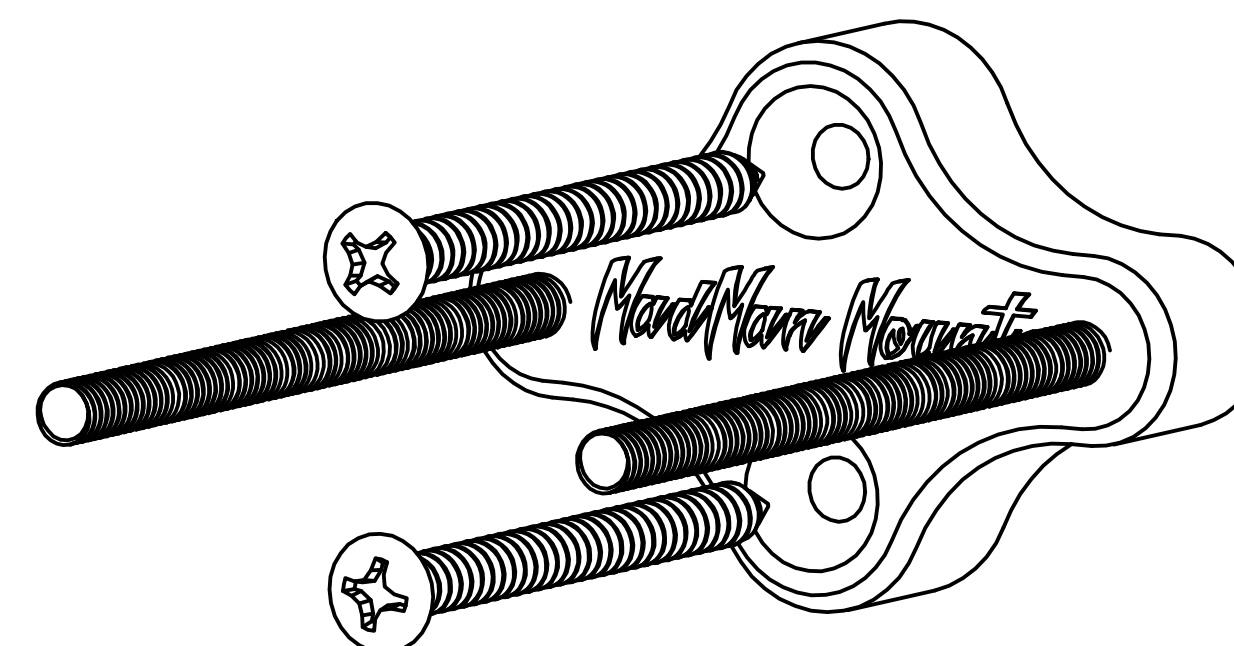

Deck Display Mount

STEP 1

Install the (2) #8-32 x 3.00 inch screws
into the threaded holes in the back side of the
Mount Plate until they bottom out and are tight.

STEP 2

Use the (2) 2.00 inch wood screws to mount
the Base Plate to a stud in your wall.
Be careful to mount it level.

STEP 3

Screw two of the rubber nuts onto the #8-32 x 3.00 inch
screws approximately 1.00 inch as shown with the wider end
towards the front.

STEP 4

Place your skateboard onto the #8-32 screws through the two top truck
mounting holes. Secure the skateboard using the remaining two rubber nuts
with the wider end towards the skateboard.
