# MadMarv Mounts

Snowboard Mount

STEP 1

Use the (2) 2.00 inch wood screws to mount
the Base Plate to a stud in your wall.
Be careful to mount it straight up and down.

STEP 2

Place the Rubber Coated Rods into each Arm and make sure
they are flush on the back side.

Use the (2) 1/4-20 x $\frac{5}{16}$ set screws to secure the Rods in place.

STEP 3

Place the 1/4-20 x $\frac{3}{4}$ inch screw into the Slotted Arm and loosely tighten.
Place the Slotted Arm onto the opposite Arm as shown.

STEP 4

Place the Arm Assembly over the Base Plate stud.
Rotate the Arms to the desired width to accept your board width.

Tighten the 1/4-20 x $\frac{3}{4}$ inch screw to secure the Arms and Base Plate.
